FieldBee

App-based affordable guidance.
Precision for EVERY farmer.

Dealer Intro

FieldBee

About Our Company

We are a precision agriculture company specializing in tractor guidance systems. With HQ in the Netherlands and R&D centers in Ukraine and Poland, we sell our products globally - both to manufacturers and to the retrofit market.
Our goal is to help the world's small farmers to work more productively and more sustainably, by leveraging the latest advances in technology.

Our team is applying modern developments in mobile, cloud, sensor, and big data technologies to build the most valuable precision products for farmers and agricultural machines.

Supplying farmers with the highest quality of products and services for fieldwork operations that is simple to use and affordable, is what our company is all about.

Our vision:

FieldBee helps every farmer feed the world by facilitating the transition to more productive and sustainable arable and orchard farming.

Our mission:

Provide accessible intelligence and machine automation for high-quality fieldwork for every farm and under all conditions.

FieldBee

Our Products

Simple, Affordable, Quality Guidance systems for agricultural machines

RTK Manual Guidance Packages

Main customer type they serve (farming): Small arable farmers with specialty crops and dairy (grassland) farmers

Sales Growth: 45% growth between first 6 month period and same period 1 year later.

FieldBee

Dealer Case Study (Smart Agri - NL)

Why they work with FieldBee:

"We like the fact that FieldBee was created for farmers by farmers. We also really like the fact that you do not need an expensive RTK subscription for every tractor when working with the base station. In the Netherlands, two years of operating with a base station can return the costs! And of course we like the prices of Fieldbee."

Do they see strong potential for growth with FieldBee products:

"Yes, we have started in October 2020 and have since made a few sales. The marketing materials they provide are also very helpful."

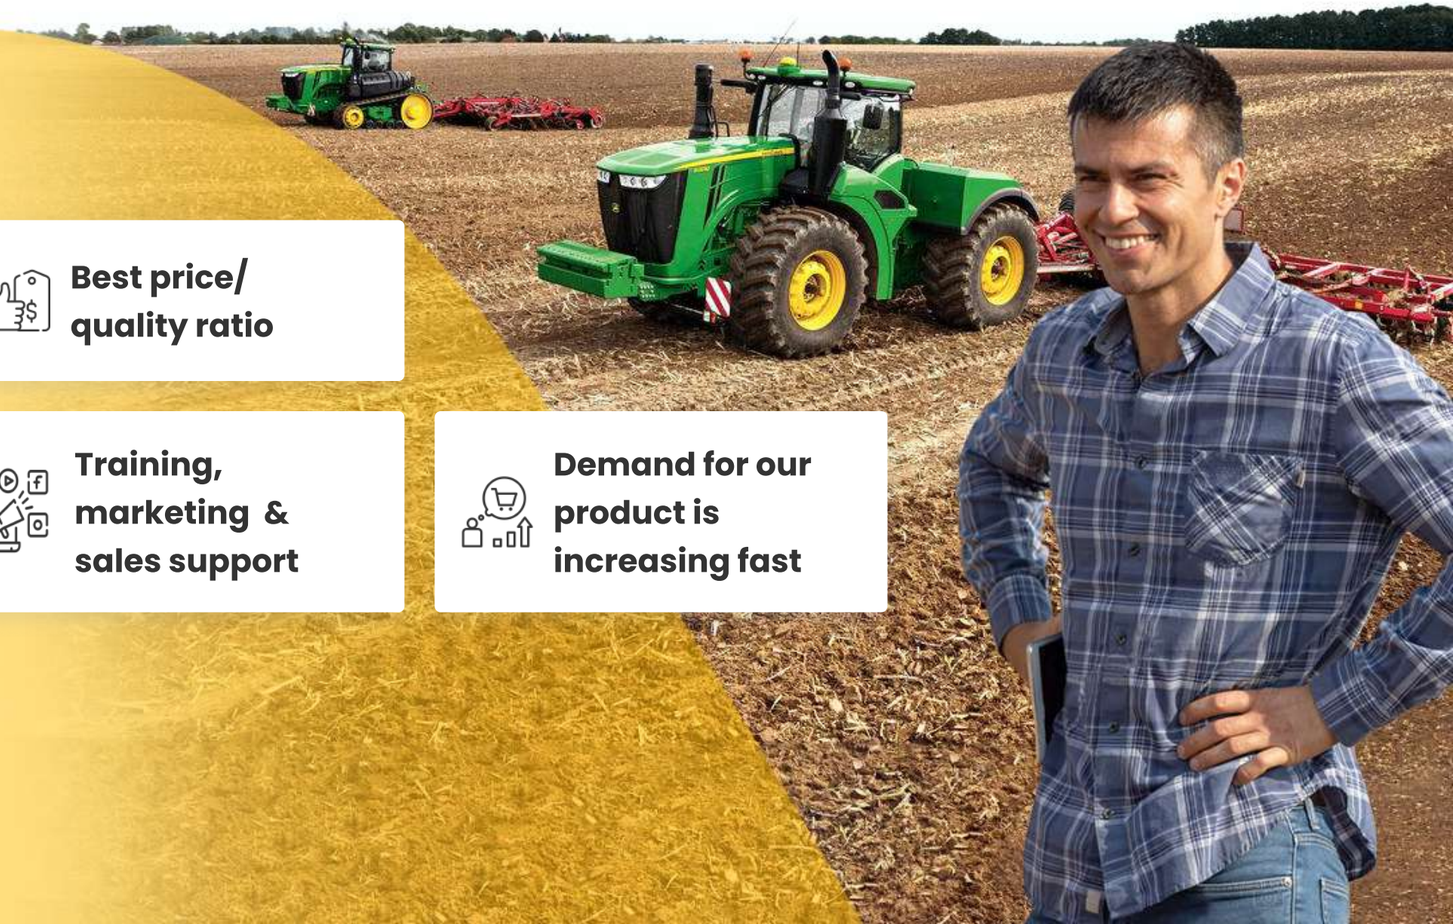
Tips they can share with beginner FieldBee dealers:

"The best way of getting more people affiliated with the brand and system is mouth to mouth marketing, the first few customers need a little more persuasion to buy and should be helped and looked after extra, even if this is not paid at first."

FieldBee

Dealer Benefits

- Fair & Transparent offering
- World class support
- Best price/ quality ratio
- Dedicated account manager
- Flexible return policy ensures a Low risk start
- Training, marketing & sales support
- Demand for our product is increasing fast



FieldBee

Farmer Happiness

Thieu Berkers
Netherlands

"Promising GPS RTK technology based on the Lora network which makes the system very affordable for farmers."

Matthew Adam,
USA

"I'm very pleased that I can work with the FieldBee, particularly for seeding, cultivating, and spraying. I' ve just to learn how to store all my parcels and even the activities that I do on my fields. So, this was a bit of my experience, with my amazing new toy, called FieldBee."

Hussein Kayal,
Turkey

"I'm working for two months with Fieldbee, and I'm very pleased with their possibilities."

Lieven Dewaele,
Belgium

"It is a very good solution at an affordable price. You can use it on every piece of equipment in combination with your smartphone or tablet. It is easy to move it from one machine to another because you don't have to remove a lot of cables."

FieldBee

Getting started

1. Explore our products, process and commercial terms.
2. Register with your FieldBee account manager as a dealer
3. Place an order for initial kits: manual guidance and autosteer
4. Receive training, and sales/marketing support, as well as familiarise yourself with our products
